Samsung Medison is a global leading medical devices company.
Founded in 1985, the company now sells cutting-edge medical devices
including diagnostic ultrasound, digital X-ray and blood analyzer,
around the world. The company has attracted global attention
in the medical field with its R&D capabilities and advanced technologies.
In 2011, Samsung Medison became an affiliate company of Samsung
Electronics, integrating its IT, image processing, semiconductor
and communication technologies into medical devices.

CT-WS80A with Elite-FTW-141203-EN

Elite is a package of leading technologies for upgraded systems.
WS80A with Elite features powerful imaging performance with advanced transducer (S-Vue)
and extended 5D capabilities (5D Heart, 5D CNS, and 5D Follicle).

S-Vue stands for Samsung smart transducer technology which supports broader bandwidth
and higher sensitivity.

Samsung
Ultrasound WS80A with Elite

The premium dimension

SAMSUNG

Premium women's health ultrasound for elite diagnosis

Making a precise diagnosis on patients is critical for physicians, and WS80A with Elite is designed to satisfy those needs, even for the complex women's health exams.
With stepped-up 3D imaging engine, physicians get clearer and more detailed images that are both life-like and void of artifact. Furthermore, advanced S-Vue transducer technology provides enhanced vision of the scanned areas, ensuring confidence in your clinical decisions.

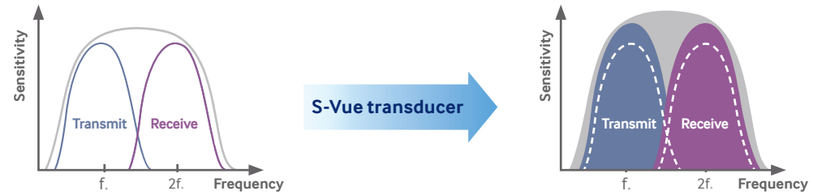
Crystal clear image for diagnostic accuracy

Hybrid imaging engine evo

Hybrid imaging engine evo combines optimal 2D, 3D and color image quality with a fast frame rate to provide more powerful data processing and noise reduction capabilities. This advanced technology provides clearer 2D and more detailed 3D images helping to improve diagnostic accuracy.

S-Vue transducer

The S-Vue transducer (CV1-8A, CA1-7A) provides broader bandwidth and higher sensitivity. This allows to deliver high image resolution even with technically challenging patients. In addition, the ergonomically designed and lightweight transducer enables users to experience less fatigue. Especially, CV1-8A is approximately 30% lighter than the conventional Samsung transducer.



*Compared with the conventional Samsung transducers

Wide angle endocavity transducer

The new wide angle endocavity transducer offers field-of-view up to 210° for the diagnosis of a wide range of diseases in gynecology examinations. It is especially useful for viewing the left-right symmetric model of fallopian tubes and ovaries.

Uterus and ovary

ClearVision™

ClearVision™ offers speckle reduction, edge enhancement and contrast enhancement for clear and natural images. In addition, ClearVision™ improves on previous technology with application-specific optimization and advanced temporal resolution in live scan mode.

Fetal spine with ClearVision™

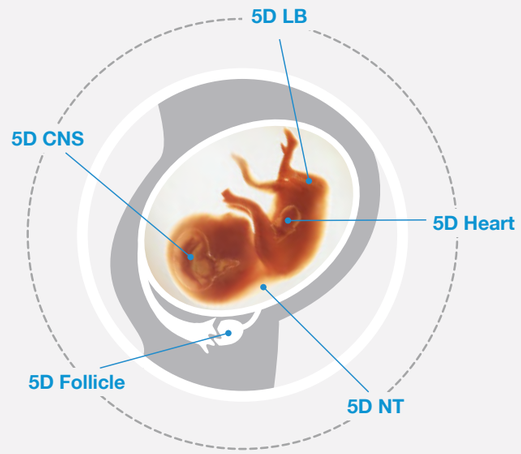
S-Flow™

S-Flow™, a sophisticated color Doppler technology with greater sensitivity, can help to detect even the peripheral blood vessels.
It enables accurate diagnosis when blood flow examination is especially difficult.

Umbilical artery with S-Flow™

Experience premium care in women's health

WS80A with Elite's 5D total solutions bring exceptional productivity in exam workflow. 5D Solutions allow utilization of the volume data providing diagnostic planes and measurements automatically. Also, it provides useful information to evaluate various fetal conditions or women's health issues.



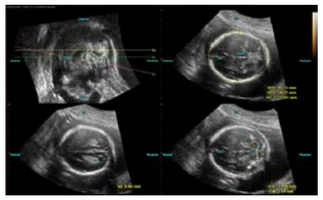
5D Heart
(Fetal heart examination)

5D Heart allows interrogation of a STIC (spatiotemporal image correlation) volume dataset using "intelligent navigation" technology, which automatically generates nine standard fetal echocardiography views simultaneously in a single template.

Fetal heart examination with 5D Heart

5D CNS
(Fetal brain measurement)

5D CNS offers 6 measurements (BPD, HC, OFD, Vp, TCD, CM) from 3 transverse planes of a fetal brain which are the key indicators for intuitive fetal brain visualization. It improves throughput with only a 2 click operation.



Fetal brain measurement with 5D CNS

5D LB
(Fetal long bone detection)

5D LB allows easy detection and measurement of fetal long bones from volume data, with intuitive visualization of the fetal structures. Evaluation of fetal condition becomes more efficient as 5D LB improves measurement accuracy while reducing exam time.

Fetal long bone measurement with 5D LB

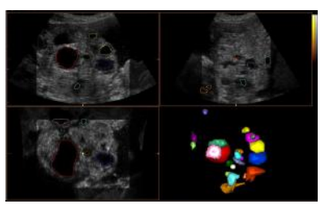
5D NT
(Nuchal translucency measurement)

Operator dependency is reduced for the first trimester fetal nuchal translucency measurements with NT measurement solutions. 5D NT applies Realistic Vue™ to automatically detected mid-sagittal view for intuitive confirmation.

NT measuement with 5D NT

5D Follicle
(Follicle measurement)

Sonographic parameters have been proven to be effective indicators when assessing in-vitro fertilization (IVF). WS80A with Elite's 5D Follicle finds follicles automatically and measures the size and the status of each follicle to provide useful information.



Follicle measurement with 5D follicle

* Above features may not be available in some countries.

Intelligent mobile communication

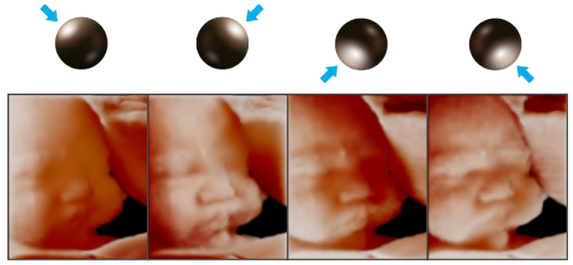
Physicians often face the challenge of performing exams and also efficiently communicating with patients. With leading-edge imaging and revolutionary technologies, such as Realistic Vue™ and Hello Mom, WS80A with Elite transforms obstetric exams enabling improved workflow and easier communication.

Realistic image rendering and Samsung's enhanced sharing technology

Realistic Vue™

Realistic Vue™ displays high resolution 3D anatomy with exceptional detail and realistic depth perception. User selectable light source direction creates intricately graduated shadows for better defined anatomical structures.

2nd trimester fetal face with Realistic Vue™



Realistic Vue™ with different directions of the light

Hello Mom

Hello Mom is an Android smartphone application for pregnant mothers that can be wirelessly connected to WS80A with Elite to download fetal ultrasound images and movies. Mothers can then easily share the ultrasound images or movies with others, and they can also keep track of their babies' growth using Hello Mom.

* Hello Mom is not an application for diagnosis.

5D Cine

WS80A with Elite provides 3D stereo images through Samsung 3D Smart TV. Mothers can enjoy these realistic images at home.

* Above features may not be available in some countries.

Efficiency in diagnosis

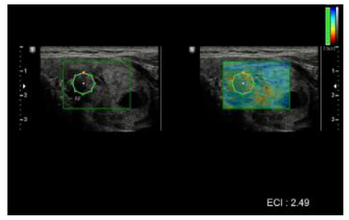
E-Breast™
(ElastoScan™ for breast)

E-Breast technology calculates the strain ratio between the selected target and surrounding tissues. E-Breast™ requires only one ROI to be selected by the user. This simplified process of selecting one ROI enhances consistency and reduces the chance of error by not manually selecting the surrounding tissue region.

Breast elastography with strain index

E-Thyroid™
(ElastoScan™ for thyroid)

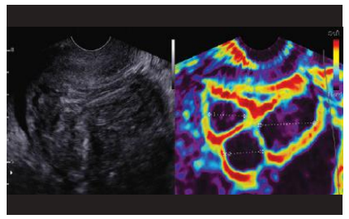
E-Thyroid™ technology provides more objective assessment of thyroid lesions by incorporating a useful index for suspicious area. E-Thyroid™ images are generated using pulsations from the adjacent carotid artery. It thereby eliminates the need for manual transducer compression for greater consistency.



Thyroid elastography with ECI

ElastoScan™ for gynecology

ElastoScan™ helps to diagnose benign gynecological disorders and to differentiate fibroids and adenomyosis. Therefore, ElastoScan™ is a promising new technique in the field of gynecology.



Elastography of uterine with ElastoScan™

MPI

MPI enables semi-automatic measurement of the fetal myocardial performance index (MPI) to reduce operator dependency in MPI measurements. MPI also improves workflow during fetal heart exams with its simple, one-click operation.

Fetal myocardial performance index measured with MPI

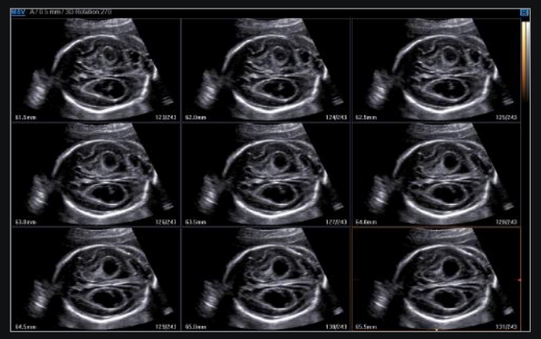
* Above features may not be available in some countries.

For higher patient throughput

In order to meet the demands of the increasingly busy clinical environments, hospitals have to continuously enhance their productivity. Capabilities of WS80A with Elite include automated functions that improve the diagnostic worklfow. Thus, exams can be performed faster, leading to higher patient throughput and increased productivity of the department.

Ideal image quality for target exams

WS80A with Elite is ideal for physicians who often perform target ultrasound exams for women's health. The premium-class 2D, 3D/4D, and color image quality of WS80A with Elite helps to increase diagnostic confidence.

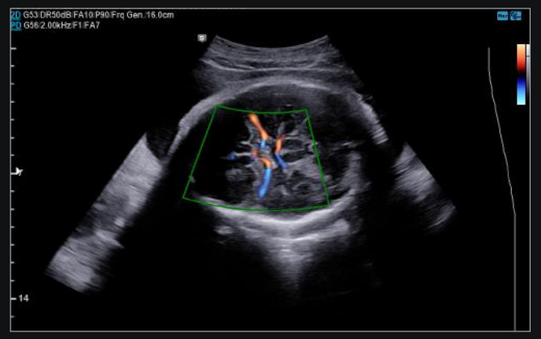


Hydrocephalus with Multi-Slice View™

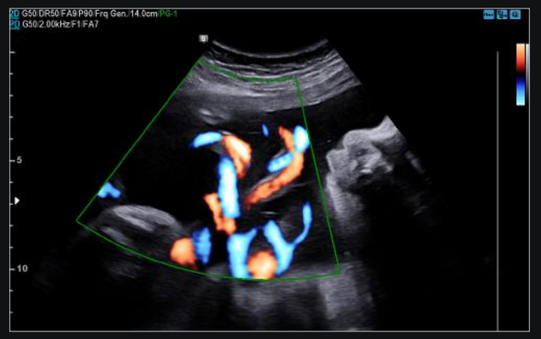
Fetal face with Realistic Vue™

Fetal heart in 4 chamber view with ClearVision™

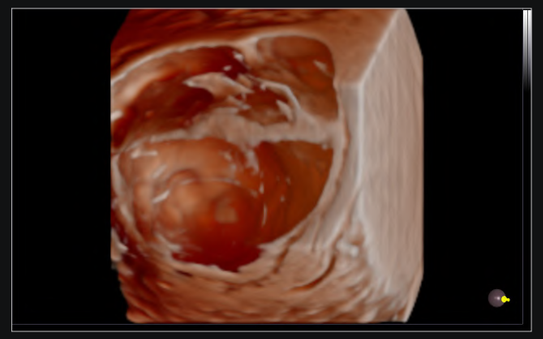
Fetus at 10 weeks



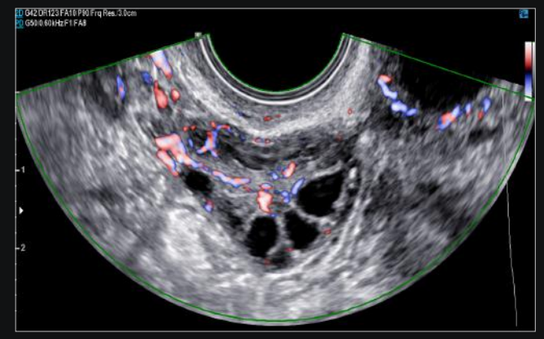
Middle cerebral artery with S-Flow™



Umbilical cord with S-Flow™



Ovarian cyst with Realistic Vue™

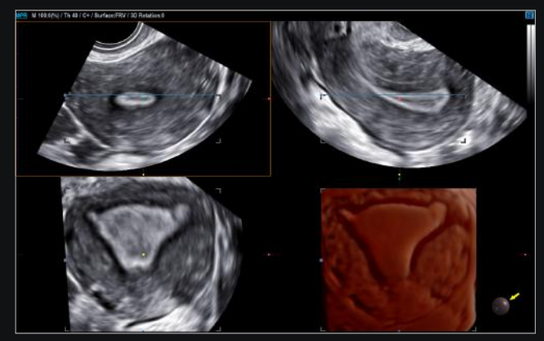


Ovarian cysts with S-Flow™

Fetal abdomen with ClearVision™

Mild pyelectasis with ClearVision™

Umbilical artery with PW



Uterus with Realistic Vue™

Stress-free performance

With design aspects that enable physicians to focus more on imaging through features such as touch screen and digital TGC, WS80A with Elite reduces stress and labor when operating the system. It provides a more beneficial environment, allowing the users more time to concentrate on an efficient and effective diagnosis.

1 Transducer cable hangers

Users can arrange the transducer cables neatly on the two hangers on either side of the system.

2 Gel warmer

Two-level adjustable gel warmer maintains ultrasound gel at a comfortable temperature from 30°C to 39°C.

3 Additional endocavity transducer holder

An additional endocavity transducer holder on the system prevents stressful situations where users accidentally knock over endocavity transducer which does not fit in standard transducer holders.

4 23-inch LED monitor

The 23-inch screen LED monitor offers you higher quality color image representation as well as higher resolution compared to conventional monitors, delivering enhanced vision of the ultrasound images.

5 10.1-inch touch screen

The 10.1-inch touch screen is highly sensitive, allowing for easy input to reduce users' stress from repetitively pressing buttons.

6 Adjustable control panel

Smooth up and down lift allows you to adjust the system to your preferred height without straining.

Superior transducers for superior imaging

The transducer line-up for WS80A with Elite includes superior S-Vue transducer and a wide-angle endocavity transducer that are optimized for women's health imaging.

Curved array transducers

CA1-7A

- Application : abdomen, obstetrics, gynecology
- Field of view : 70°

CA2-8A

- Application : abdomen, obstetrics, gynecology
- Field of view : 58°

CF4-9

- Application : pediatric, vascular
- Field of view : 92°

C2-6

- Application : abdomen, obstetrics, gynecology
- Field of view : 57.5°

SC1-6

- Application : abdomen, obstetrics, gynecology
- Field of view : 60.61°

Linear array transducers

LA3-16A

- Application : small parts, vascular, musculoskeletal
- Field of view : 38.4mm

L5-13

- Application : small parts, vascular, musculoskeletal
- Field of view : 38.4mm

L3-12A

- Application : small parts, vascular, musculoskeletal
- Field of view : 50mm

Volume transducers

CV1-8A

- Application : abdomen, obstetrics, gynecology
- Field of view : 70°

LV3-14A

- Application : musculoskeletal, small parts, vascular
- Field of view : 38.4mm

V4-8

- Application : abdomen, obstetrics, gynecology
- Field of view : 76°

V5-9

- Application : obstetrics, gynecology, urology
- Field of view : 150.6°

Endocavity transducers

VR5-9

- Application : obstetrics, gynecology, urology
- Field of view : 150.3°

E3-12A

- Application : obstetrics, gynecology, urology
- Field of view : 210°

Phased array transducer

PE2-4

- Application : abdomen, cardiac, TCD
- Field of view : 90°
